COLLECTION
ENA

COLLECTION ENA

Baytik Design's launch "Collection ENA" comprises 15 signature pieces, all designed by interior architect Grammatiki Zamani.

Born in Northern Greece, at the footsteps of the mythological Mount Olympus, Grammatiki drew inspiration for the collection from a rich array of sources.

These include simple geometric shapes, beautiful forms from traditional Greek architecture and the Classical Age.

Modernism, Japanese art and Arabic culture influences are also apparent in this singular collection of concrete furniture pieces.

The final products combine rough and sleek metal, coloured concrete and resin, with fine marble to create timeless pieces that can fit into any space.

Each piece, whether it is a chair, firepit, console or dining table, challenges some of the materials' limitations.

meet the designer

GRAMMATIKI ZAMANI

Grammatiki Zamani graduated with a Master's Degree from the National Technical University of Athens, Greece, School of Architecture and Engineering.

She has worked in Athens as an Architect Engineer, and was involved with commercial and hospitality projects, before relocating to the UAE in 2013, where she founded kiklos architects, a boutique architectural design studio.

Geometric forms from the Classical Age, principles from the traditional Greek architecture, forms from modernism and Japanese influences reflect a lot in Grammatiki's style as a designer, adding her personal touch in every kiklos' creation. Designing bespoke furniture and lifestyle pieces is a fundamental aspect of a successful vision and one of her favorite parts in every project.

DESIGNS

TRAPEZIO
CONSOLE

TRAPEZIO CONSOLE

Exuding dynamic, sharp, geometric simple lines, the 'Trapezio Console' was formed by placing the same trapezoid shape in different orientations and spots in space and then connecting its corners and edges.

*A fitting centre-piece
for any stylish living
space combining form
and function.*

QUALITY FEATURES

- ✓ Concrete designs are sealed to protect against weather conditions
- ✓ Water-resistant layer applied to prevent staining and water damage
- ✓ Special concrete mix is used containing glass fibres to ensure strength and stability
- ✓ Concrete designs are custom-made to the exact requirements of the client

QUALITY STANDARDS

Baytik Design's furniture and decorative art items are made with utmost care and attention to details. Experienced management and a skilled team of concrete experts and joiners deliver pieces with exceptional standards of quality and finishes.

Every furniture piece we develop is finished to ensure protection against the elements and prevention from damage.

Baytik Design maintains partnerships with German and Italian brands supplying optimal quality primers and top finishing materials specifically designed for concrete applications.

BUILT TO LAST

One of the appealing features of Baytik Design's furniture is that it requires little maintenance to keep it looking at its best, especially furniture in the outdoor environment. Whilst furniture made from other materials, such as wood and metal, tend to lose perfect visual and structural appearance over time, concrete furniture items age slowly and gracefully.

Proper installation, regular maintenance and visual checks will provide a longer lasting appearance of concrete furniture and artwork.

Usually over a course of time, natural stone and concrete sculptures and artworks that remain in an outdoor environment will start developing some natural discolouration, which eventually adds to the character of the sculptures and artworks.

Our concrete items benefit from a special chemical additive in their materials composition to minimise discolouration. However, slight discolouration is likely to happen in case of sustained exposure to extreme weather conditions.

GENERAL MAINTENANCE

It is recommended to re-apply protective glaze every 5 years due to accelerated aging of concrete in extreme climates.

Concrete surfaces should be cleaned as part of general maintenance as and when is required, determined by visual checks. It is recommended that the outdoor furniture and artwork are cleaned after the sand storms or rain, to maintain perfect visual appearance.

- ✓ Remove dust etc. by wiping down with a moist cloth and dry with a clean dry cloth.
- ✓ Bird droppings, etc. should be removed as soon as possible to avoid potential damage to the finishes.
- ✓ Do not use traditional heavy acid cleaners.
- ✓ Do not use abrasive materials or hard brushes. Instead clean with a soft cloth or fibre dust brush/mop.
- ✓ Do not clean with pressure washers. Instead clean with a low-pressure gardening hose.
- ✓ Use desalinated water and mild soap, if necessary.
- ✓ Take care whilst moving heavier items with enough man power and careful handling.

ANNUAL MAINTENANCE

- ✓ Re-apply protective glaze layer minimum every 5 years.
- ✓ Before application, clean and dry the concrete surface by hand to remove dirt.
